

State of Alaska FY2003 Governor's Operating Budget

Department of Transportation/Public Facilities Central Region Planning Component Budget Summary

Component: Central Region Planning

Contact: Mark Mayo, Transportation Planner

Tel: (907) 269-0519 **Fax:** (907) 269-0521 **E-mail:** Mark_Mayo@dot.state.ak.us

Component Mission

The mission of Central Region Planning is to contribute to the development of the Statewide Transportation Improvement Program (STIP), the Statewide Transportation Plan, and regional plans through a public process that results in orderly project and capital budget sequencing, and to conduct highway data collection.

Component Services Provided

- Establishing and maintaining cooperative planning processes with the Division of Design and Engineering Services, Maintenance and Operations, other state and federal agencies, and local governments. This includes providing legislators, local governments, other agencies and private citizens with a central point of contact to facilitate the exchange of information with the department and to allow these groups access to the Department of Transportation and Public Facilities decision-making process;
- Meeting requirements of the Federal Highway Administration (FHWA) that make Alaska eligible to receive over \$400 million each year. These requirements include collection of traffic and highway inventory data, coordination with local governments, implementation of public involvement procedures, and development of a STIP for FHWA funds;
- Meeting requirements of the Federal Aviation Administration (FAA) that make Alaska eligible to receive over \$140 million annually for airport development in Alaska. These requirements include verification of enplanement data used to determine the State's allocation of FAA funding, the preparation of airport master plans, and the annual preparation of the program for aviation improvements;
- Preparing a capital improvement program to address improvement needs for roadways, ports and harbors, erosion control, pathways, barrier-free access, and other public facilities.

Component Goals and Strategies

- Involve the public in the identification and evaluation of transportation needs, plans, and programs
- Conduct public meetings to share and gather information on transportation needs.
- Develop transportation plans and programs that meet federal requirements for financial assistance.
- Coordinate transportation information and planning with local governments.
- Implement public involvement procedures.
- Integrate the planning process with the annual capital budget development. Meet requirements of the Federal Highway Administration (FHWA), Federal Transit Administration (FTA), and Federal Aviation Administration (FAA) that make Alaska eligible to receive transportation funding.
- Collect highway vehicle traffic data for volume, classification, and weigh-in-motion and prepare required reports for submittal to FHWA.

Key Component Issues for FY2002 – 2003

- Continue to Implement the Federal Transportation Equity Act for the 21st Century (TEA 21). Passage of the 1991 and 1998 Federal Transportation Bills expanded the requirements to inform and involve the public in development of transportation plans and programs. As a result, the area planning staff instituted a greatly expanded public involvement program including holding multiple meetings throughout the region and other communications with the local governments and the general public. Planning staff then evaluates and ranks all projects to identify the highest priority projects that are to compete statewide for federal highway funding. TEA 21 has significantly increased federal funding for surface transportation in Alaska.
- Airport capital projects at state-owned airports are identified by the Department and funded by the Federal Aviation Administration through the Airport Capital Improvement Program (ACIP) which is designed to distribute Airport Improvement Program funds based upon priority and need. The Department's own Aviation Project Evaluation Board (APEB) process has been expanded to place a greater emphasis on public involvement and project prioritization in

order to provide the ACIP with the information it requires. Regional planning staff must prepare extensive planning level background information for each proposed aviation project. This activity requires a greater level of interaction between regional planning staff, other DOT&PF functional groups, other state and federal agencies, local governments and the public. The recent passage of the Aviation Investment and Reform Act for the 21st Century (AIR 21) substantially increases the funding for airport improvements in Alaska.

Recent terrorist strikes in the U.S. have raised concerns about the security of airports nation-wide. Over the next

- year, DOT&PF will coordinate closely with the FAA to assist in the development of new federal airport security requirements. Security-related design requirements will need to be sensitive to Alaska's unique aviation system, climate, and cultural environment.
- Annual general fund levels have decreased to the point that activities and program areas not directly supported by planning grants received from the FHWA or the FAA will have to be deferred. Included in this category is work associated with erosion control, and ports and harbors.
- The state's ports and harbors represent a significant financial investment and are an important element in the continued health of the commercial and recreational fishing industries. Unlike Alaska's federal-aid highways and airports, port and harbor facilities do not have an annual source of state-administered capital funding.
- Highway Performance Monitoring System (HPMS) sampling requirements for FHWA data collection have increased during the last 2 years. Staff has been able to accomplish some savings through installation of automated traffic recorders and management of a consultant contract for a portion of the required traffic counts. Installations and upgrades to equipment and traffic recorder sites continue through the development of capital projects. These recorders will eventually need routine maintenance and replacement and/or upgrades.

Major Component Accomplishments in 2001

Completed amendments to FFY2001-2003 Statewide Transportation Improvement Program.

- Maintained 10 cooperative planning processes with local governments.
- Initiated 3 airport master plans.
- Reviewed 60 other government agency plans.
- Reviewed 494 subdivision plats and zoning reviews for local governments.
- Prepared traffic forecasts and design designations for 35 highway construction projects.
- Processed all information needed for the annual submission of the Highway Performance Monitoring System (HPMS).
- Prepared and distributed the Annual Average Volume Report and Annual Anchorage Daily Traffic (AADT) map series.
-

Statutory and Regulatory Authority

- AS 02 Aeronautics
- AS 36 Public Contracts
- AS 37 Public Finance
- AS 44 State Government
- AAC 17 Department of Transportation and Public Facilities

Proposed Changes in Levels of Service for FY2003

As a result of the expanded federal programs, a new Planner will be added to assist in the development of the Statewide Transportation Improvement Program (STIP) and the Aviation Improvement Program (AIP)

Summary of Component Budget Changes

From FY2002 Authorized to FY2003 Governor

All dollars in thousands

	<u>General Funds</u>	<u>Federal Funds</u>	<u>Other Funds</u>	<u>Total Funds</u>
FY2002 Authorized	128.7	0.0	1,077.0	1,205.7
Adjustments which will continue current level of service:				
-Year 3 Labor Costs - Net Change from FY2002	1.8	0.0	30.2	32.0
Proposed budget increases:				
-Add one new PFT position to assist in the development of STIP and AIP Programs	0.0	0.0	71.8	71.8
-Increase CIP Receipts to meet the vacancy factor guidelines established by OMB	0.0	0.0	15.0	15.0
FY2003 Governor	130.5	0.0	1,194.0	1,324.5
